

## PUBLICATIONS FROM PREVIOUS GAP WORKSHOPS

### The 2nd GAP, Haifa, ISRAEL, 1984

#### Papers published in Journal of Plankton Research Volume 7, Number 5, 1985

**Y. Collos and G. Slawyk.** On the compatibility of carbon uptake rates calculated from stable and radioactive isotope data: implications for the design of experimental protocols in aquatic primary productivity. 595

**U. Uchlinger.** An in situ pulse light fluorometer for chlorophyll determination as a monitor for vertical and horizontal phytoplankton distribution in lakes. 605

**C.S. Yentsch and D.A. Phinney.** Spectral fluorescence: a taxonomic tool for studying the structure of phytoplankton populations. 617

**D.A. Phinney and C.S. Yentsch.** A novel phytoplankton chlorophyll technique: toward automated analysis. 633

**L.M. Jensen.** <sup>14</sup>C-labelling patterns of phytoplankton: specific activity of different product pools. 643

**J.U. Grobbelaar.** Phytoplankton productivity in turbid waters. 653

**A.M. de Roos and B.J.G. Flik.** Modelling time-series of photosynthesis and comparisons with the fluorescence yield in *Chlorella vulgaris*: a study of adaptation, inhibition and recovery. 665

**T. Ishimaru, M. Mimuro and Y. Fujita** Estimation of phytoplankton photosynthesis using a fluorescence induction technique. 67

**R.O. Megard, T. Berman, P.J. Curtis and P.W. Vaughan** Dependence of phytoplankton assimilation quotients on light and nitrogen source: implications for oceanic primary productivity. 691

**S.S. Bates.** Sample preconditioning for measurement of fluorescence induction of chlorophyll a in marine phytoplankton. 703

**P. Falkowski and D.A. Kiefer.** Chlorophyll a fluorescence in phytoplankton: relationship to photosynthesis and biomass. 715

**F. Schanz and Z. Dubinsky** The afternoon depression in primary productivity in a high rate oxidation pond (HROP). *J. Plankton Res.* 10: 373 1988
