

## PUBLICATIONS FROM PREVIOUS GAP WORKSHOPS

### The 5th GAP, Breukelens, NETHERLANDS, 1990

#### Papers published in *Hydrobiologia*, Volume 238, 1992 (Developments in Hydrology 76)

##### PART ONE: THE DAILY GROWTH CYCLE

###### The Keynote Lectures

**B. B. Prezelin.** Diel periodicity in phytoplankton productivity. 1

**W. F. Vincent.** The daily pattern of nitrogen uptake by phytoplankton in dynamic mixed layer environments. 37

##### PART TWO: DAILY PATTERNS OF GROWTH IN CULTURE AND LAKE

###### Experimental Work

**J. U. Grobbelaar, B. M. A. Kroon, T. Burger-Wiersma and L. R. Mur.** Influence of medium frequency light/dark cycles of equal duration on the photosynthesis and respiration of *Chlorella pyrenoidosa*. 53

**B. M. A. Kroon, U. M. van Hes and L. R. Mur.** An algal cyclostat with computer-controlled dynamic light regime. 63

**B. M. A. Kroon, M. Latasa, B. W. Ibelings and L. R. Mur** The effect of dynamic light regimes on *Chlorella*: I. Pigments and cross sections. 71

**B. M. A. Kroon, T. Burger-Wiersma, P. M. Visser and L. R. Mur.** The effect of dynamic light regimes on *Chlorella*: II. Minimum quantum requirement and photo-synthesis-irradiance parameters. 79

**H. W. Balfourt, T. Berman, S. Y. Maestrini, A. Wenzel and T. Zohary.** Flow cytometry: instrumentation and application in phytoplankton research. 89

**H. J. Gons, J. Kromkamp, M. Rijkeboer and O. Schofield.** Characterization of the light field in laboratory scale enclosures of eutrophic lake water (LakeLoosdrecht, The Netherlands). 99

**J. Kromkamp, F. Schanz, M. Rijkeboer, E. Berdalet, B. Kim and H. J. Gons.** Influence of the mixing regime on algal photosynthetic performance in laboratory scale enclosures. 111

**S. Markager, A.-M. Jespersen, T. Vindbaek Madsen, E. Berdalet and R. Weisburd.** Diel changes in dark respiration in a plankton community. 119

**A. Schweizer and R. E. Heusel.** Picoplankton photosynthesis and diurnal variations in photosynthesis-irradiance relationship in a eutrophic and meso-oligotrophic lake. 131

### **PART THREE: CELL CYCLE AND PRODUCTIVITY**

Papers contributed to Posters

**E. Berdalet, M. Latasa and M. Estrada** Variations in biochemical parameters of *Heterocapsa* sp. and *Olisthodiscus luteus* grown in 12:12 light: dark cycles: I. Cell cycle and nucleic acid composition. 139

**M. Latasa, E. Berdalet and M. Estrada.** Variations in biochemical parameters of *Heterocapsa* sp. and *Olisthodiscus luteus* grown in 12:12 light: dark cycles: II. Changes in pigment composition. 149

**V. Martin-Jezequel.** Effect of Si-status on diel variation of intracellular free amino acids in *Thalassiosira weissflogii* under low-light intensity. 159

**H. J. Gons and M. Rijkeboer.** The 'true' growth efficiency of phytoplankton as influenced by light attenuation and insolation: implications of the photosynthesis-irradiance relationship. 169

**J. U. Grobbelaar.** Nutrients versus physical factors in determining the primary productivity of waters with high inorganic turbidity. 177

**U. Hansen, G. Patzold and R. Sachse.** Deep chlorophyll a maxima in the Red Sea observed by in-vivo flash fluorometry. 183

**C. Pahl-Wostl.** Dynamic versus static models for photosynthesis. 189

**M. Rijkeboer, W. A. de Kloet and H. J. Gons.** Interspecific variation in pigmentation: implications for production estimates for shallow eutrophic lakes using an incubator. 197
